Skills

C# / ASP.NET Core MVC	Entity Framework Core	JavaScript / HTML / CSS
SQL / SQLite	Git / GitHub / Jira	Full-Stack Web Development
Python / Java	REST / CRUD Workflows	Windows / Mac / Linux

Experience

Safe Future Foundation

2025 - 2026

Full-Stack Developer

- Delivered one year of professional full-stack development for a Jacksonville nonprofit by building and refining an ASP.NET Core MVC inventory system with QR-based item tracking, CSV export, stronger validation, and client-driven iteration.

UNF Cyber Security Team

2024 - May 2026

Web Specialist and Windows Specialist

- Competed on UNF's cybersecurity travel team in web and Windows-focused roles.
- Trained through regular practice focused on realistic security scenarios and defensive problem-solving.
- Attended lectures and learning sessions led by industry security professionals.

Casp Enterprises / Independent Clients

2019 - Present

IT Manager (2021-Present) / Independent Technology Consultant

- Manage an Apple-centered small-business environment, including devices, accounts, iCloud collaboration, upgrades, troubleshooting, and purchasing.
- Advise on storage, backup, security, and workflow improvements while supporting long-term private clients.

Wired Works (Network and Audio Visual)

Apr 2021 - Sep 2021

Assistant Audio-Visual Installer

- Installed networking and audio-visual systems for homes and businesses.
- Configured smart-home automations with platforms including Alexa and Sonos.

Projects

XnEngine Framework

MO2 plugin framework for classic XnEngine games

- Built a Mod Organizer 2 framework for classic XnEngine titles by reverse-engineering legacy formats, implementing archive and save tooling, and generating runtime patches without modifying game installs.

Directed Independent Study

UNF Cyber Team Readiness, Gap Analysis, and Curriculum Design

- Researched UNF cyber team readiness and continuity gaps; produced current-state analysis, future-state recommendations, and a penetration testing course proposal.
